

Computer Etiquettes

Let's Recall

Write four things we do on a computer by taking the help of pictures given below :

1. .....

2. .....

3. .....

In this Chapter

- Computer Etiquettes
- Don'ts
- Steps to shut down a computer
- Do's
- Steps to turn on a computer

COMPUTER ETIQUETTES

Computers are very useful devices. They need to be taken care of properly. If you don't take care of them, they may not work correctly and you may not be able to complete your tasks.

To take care of them, we should follow some rules. These are called Do's. We should also avoid certain things when we are near a computer. These are called Don'ts.

Do's in the Computer Lab

Remove your shoes outside the lab before entering the computer lab.

Always enter the lab in a queue quietly.

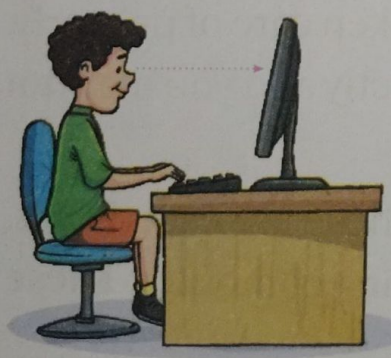

Maintain discipline and share your computer with your friend.

Always keep your back straight. Place your feet flat on the ground. Keep your arms at the same level as the keyboard.

The top of the screen should be at your eye level. Stand up and stretch after every 20 minutes.

Always shut down the computer before leaving the lab and switch off the power supply.

Don'ts in the Computer Lab

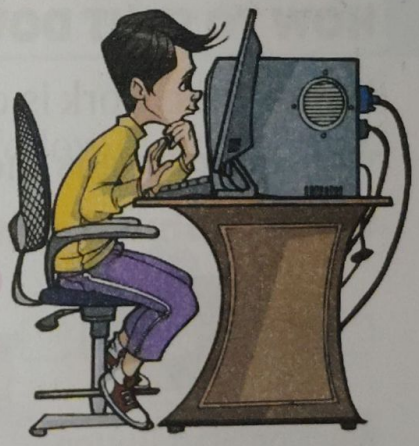

Never talk loudly in the computer lab.

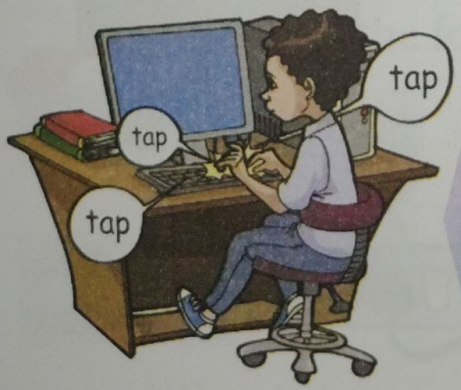

Do not get excited and start shouting by seeing any new task done by computer.

Do not take any eatables in the computer lab. Don't eat or drink near the computer.

Do not lean towards monitor. Keep distance while working on computer and don't come close to the monitor. Do not work continuously for long duration on computer.

Do not hit the mouse or keyboard too hard. Handle them gently.

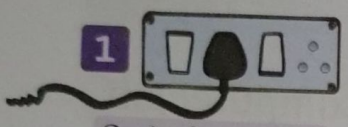

Let's Get Better

Why is it important to keep the computer lab clean and follow the rules when using the computers?

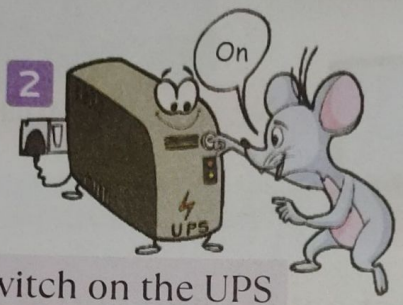

HOW TO START A COMPUTER?

Starting a computer is a simple process. But you need to follow the instructions carefully otherwise your computer will not start. Here are the steps you need to follow to start the computer :

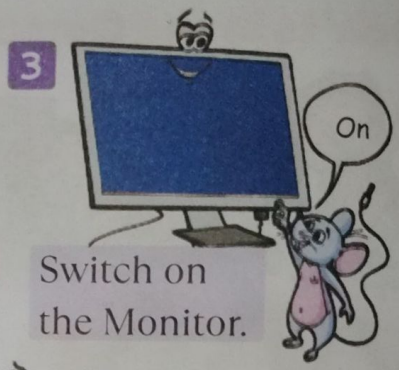

Steps to Turn On the Computer

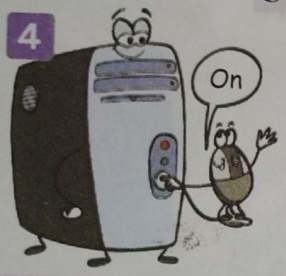

1 Switch on the electricity for Computer.

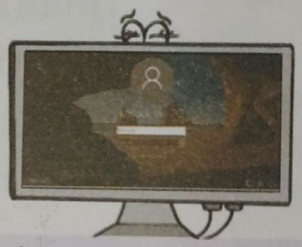

2 Switch on the UPS

3 Switch on the Monitor.

4 Switch on the CPU.

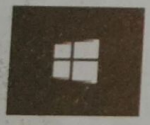

5 Desktop will appear on the Monitor.

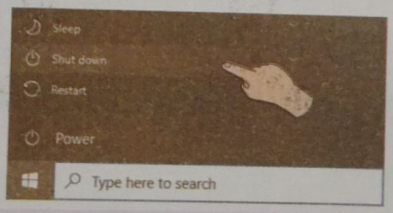

HOW TO SHUT DOWN A COMPUTER?

When your work is completed, you need to shut down the computer as well. Following is the process to shut down the computer :

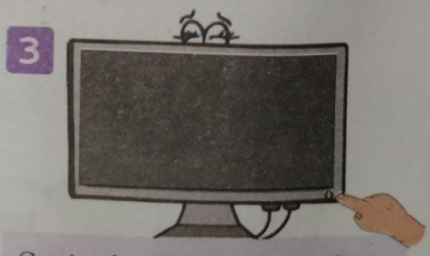

Steps to Shut Down the Computer

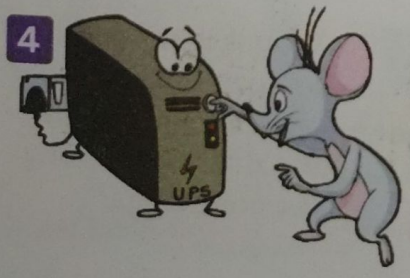

1 Click on Start Button on Desktop with Mouse.

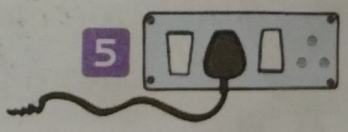

2 Click on Power, then click on Shut Down.

3 Switch off the Monitor

4 Switch off the UPS.

5 Switch off the Power switch.

Activity Corner

Colour the wrong body posture with blue and correct body posture with yellow.
