

Getting Familiar with Keyboard

Let's Recall

Circle the picture that have keys.

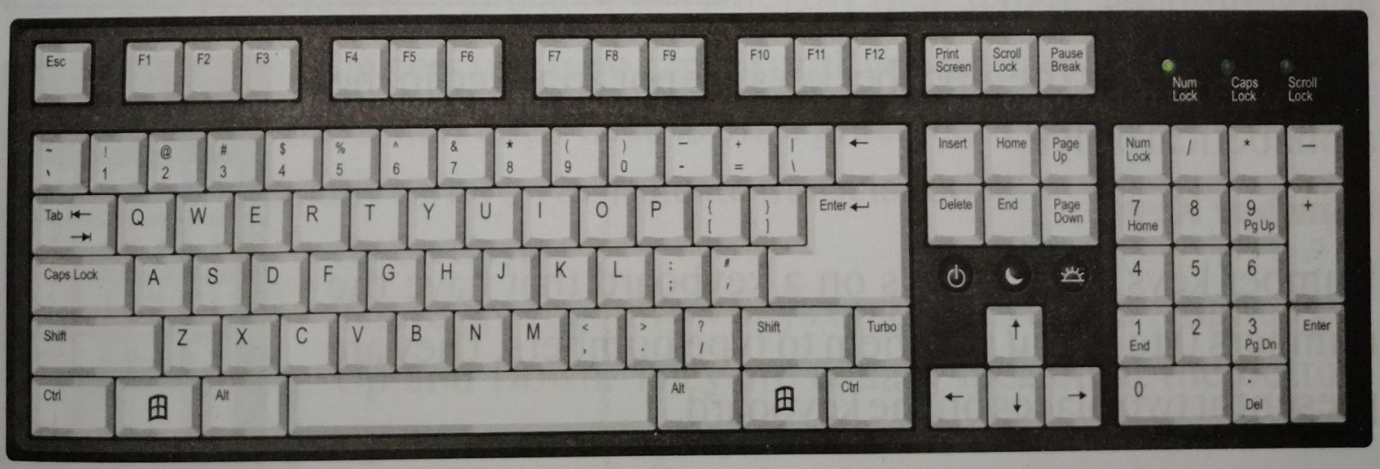

In this Chapter

- What is a Keyboard?
- About Keys of Keyboard

When we need to write something, we use a pen or a pencil. But have you ever wondered how we write on a computer? The answer is the keyboard. We use the keyboard to write on a computer. In this chapter, we will read about the keyboard in detail and learn about its functions.

A KEYBOARD AND ITS KEYS

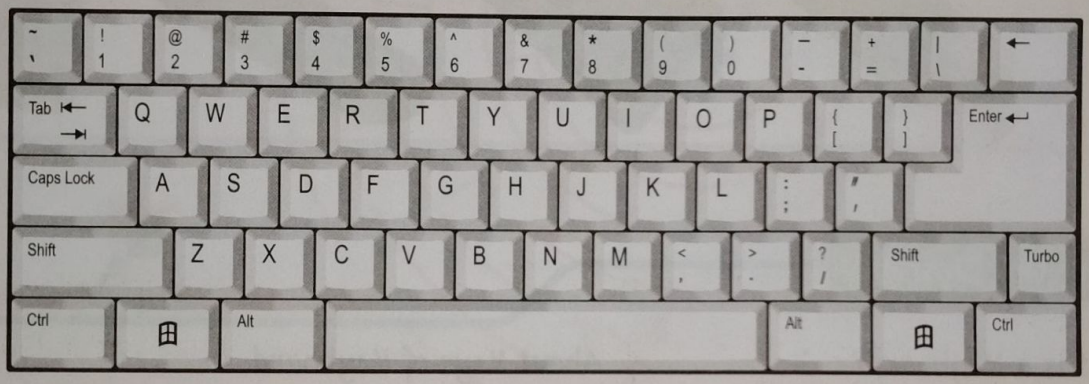

A keyboard is generally a rectangular board that has many buttons on it. We call them keys. It is a device that lets us to type letters, numbers and symbols into a computer. Each key has different characters on them. There are 104 keys on the keyboard. These are divided into three categories.

1. Alphabet keys 2. Number keys 3. Special keys

Activity Corner

Colour the keys which correctly spell your mother's name.

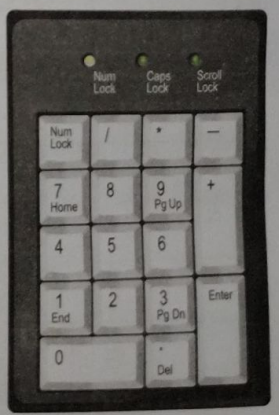

Alphabet Keys

Alphabet keys are the keys on a keyboard that have the letters A to Z. You use them to type words and sentences.

You can see that the alphabet keys are not arranged in the alphabetical order.

Number Keys

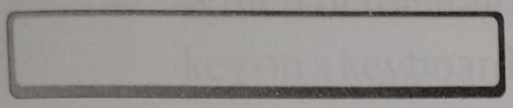

Number keys are the keys on a keyboard that have the numbers 0 to 9. You use them to type numbers. They are present at two places on the keyboard.

Special Keys

Special keys on a keyboard are keys that perform specific functions. They include :

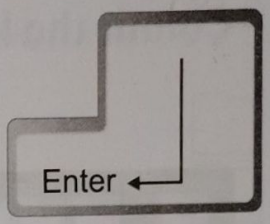

Spacebar Key

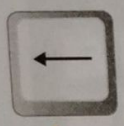

If you look at the keyboard, you will see a very long key on it in the last row. It is the spacebar key. It is used to add blank space between two letters or words.

Enter Key

Enter key is also present at two places on keyboard. It is used to start a new line or run a command.

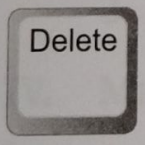

Backspace Key

Backspace key is used to erase anything written on the left side of the cursor.

INFO Byte

When you start typing, you will see a small, blinking line or arrow on the screen that shows where you are typing or clicking. This blinking line is called cursor.

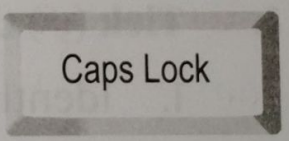

Delete Key

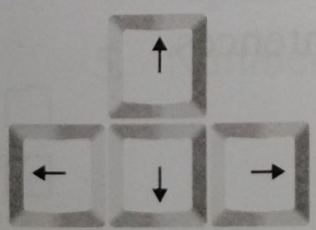

Delete key is used to erase anything that is written on the right side of the cursor.

Caps Lock Key

The Caps Lock key is a key on the keyboard that, when pressed, makes all letters you type capital until you press it again to turn it off. When Caps Lock is on, a green light on the keyboard usually turns on to indicate that it is active.

Arrow Keys

There are four arrow keys on the keyboard : Right, Left, Up and Down. They are usually located at the bottom right corner of the keyboard.

Arrow keys are keys on the keyboard that let you move the cursor or scroll the screen in four directions : up, down, left and right accordingly.

Let's Get Better

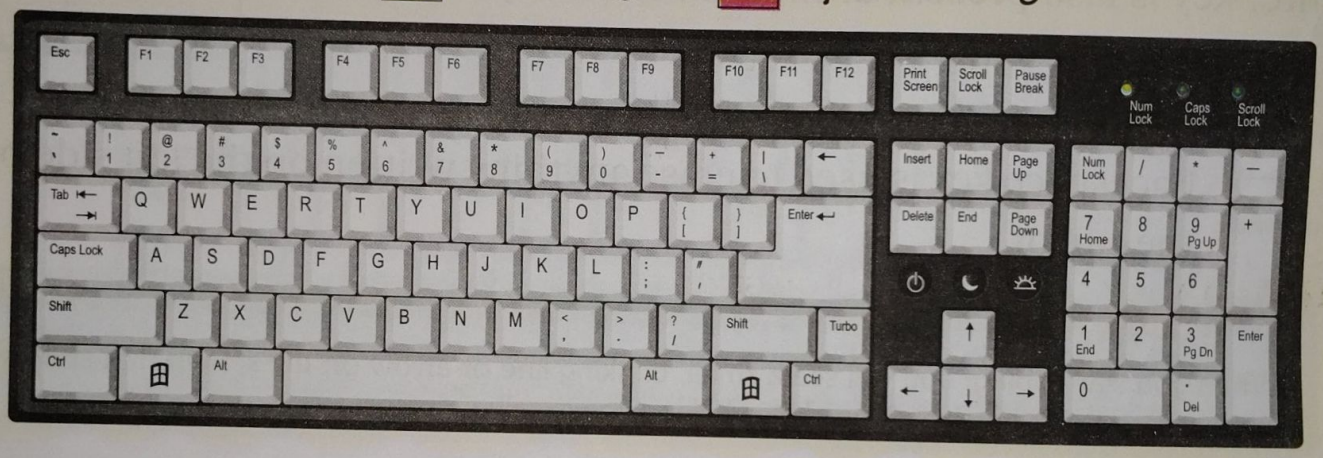

Why is it important to press the keys gently when typing on the keyboard?

Activity Corner

Colour the keys.

Number keys Alphabet keys Enter keys

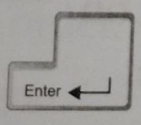

Arrow keys Spacebar key

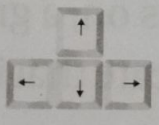

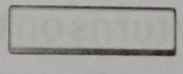

Exercise

I. Tick (✓) the correct option :
